

# BUILDING MODELS OF CHANGE: BRIDGING SCIENCES AND HUMANITIES

**12.-14. March 2025**

**ZIF – Zentrum für  
interdisziplinäre  
Forschung**

We are delighted and honoured to welcome you to Bielefeld, Germany between **12. and 14. March 2025** for this interdisciplinary conference.

This unique gathering offers a groundbreaking exploration across disciplines by bringing together researchers from different countries, spanning the natural sciences, social sciences, and humanities.

The conference aims to pave the way for more fruitful crossdisciplinary collaboration as speakers and participants will collectively bridge the gap between various fields and explore the diverse world of modelling within them.

**Key topics include:**

- The concept and development of models across disciplines
- Innovative approaches to modeling processes of change under uncertainty
- Assessment and communication of models
- The potential for interdisciplinary model transfer

You can expect speakers with expertise in psychology, (digital) humanities, economics, mathematics, computer science, chemistry and biology. Therefore this conference is designed for scholars from all disciplines interested in contributing to interdisciplinary collaboration.
